**AUTOMATIC BOOK SCANNER  
FOR MAXIMUM PRODUCTIVITY**

# SYSTEM OVERVIEW

## ScanRobot® 2.0 MDS

### High quality - Automatic Book Scanner

- Fast - up to 2,500 pages per hour
- Distortion free & gentle scanning (prism technology)
- Unique 60° V-shape book cradle
- Single scan technology (for covers, folded maps, loose pages, ...)
- Self standing unit on wheels for easy relocating
- Ergonomic design
- ISO compliant image quality (optionally available)

### Unique hardware features

#### Wooden 60° V-shape book cradle

- \* Adjustable between 60° and 100°
- \* Minimum load/unload time
- \* Suitable for valuable old & new books
- \* Applicable for hard & soft covers

#### Patented capturing technology

- \* Unique 60° prism
- \* One central capturing unit
- \* Equal and constant focus
- \* No mechanical shutter

#### Only one mechanical moving part

- \* Robust and simple design
- \* Built for 24h shift operation
- \* Low maintenance
- \* Very long life cycle

# ADVANTAGES

## ScanRobot® 2.0 MDS

### Page turning technology

- Most gentle & touch free page turning by air flow
- Automatic (up to 2,500 pph)
- Process monitoring & double sheet control
- Semi-automatic / weightless mode
- No clamps
- No fingers
- No glass plates

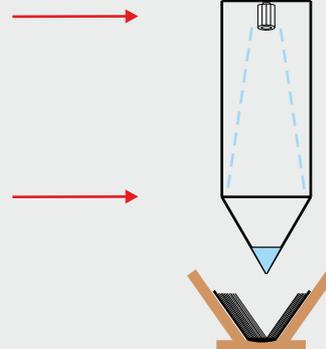

### Patented capturing system

#### Closed capturing unit (optical 400 dpi)

- \* Independent from ambient light
- \* Minimum calibration (static white balance)
- \* Constant distance between object and focal plane

#### Inside LED illumination

- \* Perfect homogenous page illumination
- \* High color reproduction index value (CRI)
- \* No radiation of heat, infrared or UV light
- \* Long life cycle LED technology

#### High quality 60° prism technology

- \* Distortion free scanning
- \* Smallest book opening angle - unique 60° V-shape

The ScanRobot® can scan every page with the exact, constant and maximum resolution independent of the book size, thickness and the paper quality.

# UNIVERSAL, GENTLE & ROBUST

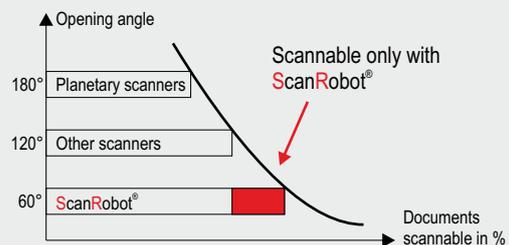

## ScanRobot® 2.0 MDS

### Universal - suitable for any bound material

### Gentle - suitable for historic books (from the 14<sup>th</sup> century on)

- Book opening angle 60°
- No overstretching of the book binding
- Pressure free scanning
- Touch free page turning by air flow
- LED illumination without any radiation of heat, infrared or UV

### Developed for Mass-Digitization

- Robust - Designed for 24/7 shift operation
- Reliable - Only one active moving part
- High quality industrial components (low downtime)
- Very long system life cycle
- Worldwide customer proven

# SCAN QUALITY - 1/3

$$F_{\lambda,0} = \int_0^{\lambda} \epsilon_0 \epsilon_{\lambda} d\lambda$$

respectively, where

$$G = \int_0^{\lambda} G_{\lambda} d\lambda$$

As was the case for the wavelength-dependent parameters, the sum of the total reflectivity, total absorptivity, and total transmissivity must be equal to unity, that is,

$$\rho + \alpha + \tau = 1$$

It is important to note that while the emissivity is a function of the material, temperature, and surface conditions, the absorptivity and reflectivity depend on both the surface characteristics and the nature of the incident radiation.

The terms reflectivity, absorptance, and transmittance are used by most authors for the real surfaces, and the terms reflectivity, absorptivity, and transmissivity are reserved for the properties of the ideal surfaces (i.e., those optically smooth and pure substances perfectly unaccommodated) Sur-

- No distortions
- No curvature
- No waves
- Exact page margin scan
- Perfect illumination

# ScanGate® RT - CAPTURING SOFTWARE

## Real-Time image processing for ScanRobot® 2.0 MDS

### Advantages

#### AUTOMATION IN REAL-TIME

- Capturing & image processing in real-time
- Automated creation of best practice outputs for
- Archiving, Presentation and Reprint
- Live view of processed images
- Efficient job management

### Specifications

#### Professional real-time image capturing & processing

The ScanGate® RT software enables real-time image processing during the scanning process. Ready-to-use output is created in one single and automated step without loss of speed.

#### Pre-defined output options

Best practice outputs for Archiving, Presentation and Reprint are included (details see next page).

#### Live view of scanned & processed images

The fast live view of the scanned & processed images with the pre-defined output options allows real-time quality control.

#### Efficient job management

The profile administration allows to store settings as basis for new jobs. This ensures e.g. fast book changeovers and to process repetitive jobs (similar books) highly efficiently.

#### Powerful recognition & evaluation functions

Automatic border & page color recognition, text base line detection, border evaluation (e.g. page size, margins etc.)

#### Real-time image processing tools

Deskewing, cropping, rotation, extrapolation, ICC profile rendering, background homogenization / normalization, achromatism reducing, binarization (dynamic threshold), brightness / contrast adaption, unsharp masking, image scaling

**High quality color management** - According to ICC profile standards.

**Dublin Core metadata interface** - For the creation of fixed metadata xml-files based on the Dublin Core standard.

**Multi language user interface** - Software available in over 15 languages.

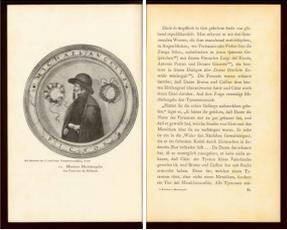

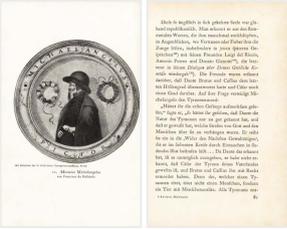

**External interface** - Intuitive interface for the included flatbed scanner (e.g. for scanning of folded maps, covers, etc.).

**Flexible storage in multiple file formats** - JPEG, JPG2000\*, TIFF, TIFF G4, PNG, GIF, BMP, PDF\*, PDF/a\*

\* Formats may be generated within a separate process.

## RT-Batch workflows for Automated Batch Processing™ (optionally available)

### Advantages & Benefits

The customized RT-Batch workflows enable automated batch processing\* in scan-free periods (e.g. overnight, weekends, longer scanning breaks etc.). Within this a customized set of system functions like creating another output format, copying files to e.g. another storage place, executing of additional image processing functions etc. will be processed fully automated (e.g. overnight).

### Automatic execution of several tasks in the batch-processing

Tasks can be combined (according to the individual customer request) to a batch, which is executed sequentially and automatically until the last task.

#	Task
01	SCANNING - RT Output: Archiving (master tiffs, color, 400 dpi)
02	PAGE ORDER - Rename pages
03	IMAGE TREATMENT - Crop pages (smaller than page size)
04	IMAGE TREATMENT - Unsharp masking
05	FORMATS - Create Jpegs (greyscale, 300 dpi)
06	FORMATS - Create multipage PDF (bitonal, 600 dpi)
07	OUTPUT - Copy Jpegs to destination
08	OUTPUT - Upload PDF via FTP
09	ARCHIVE - Clean job and compress master tiffs (LZW)
10	ARCHIVE - Create backup copy of the job
11	CLEANUP - Delete job after 10 days

- ➔ Scanning of the images in the format "RT Output: Archiving"
- ➔ Rename all pages systematically
- ➔ Execute time consuming image treatment functions
- ➔ Create different output formats
- ➔ Copy the created output safely to its destination
- ➔ Reduce data size to a minimum for a backup copy
- ➔ Empty the disk space after a certain period

### Queuing of several jobs for the batch-processing

During the day the jobs\* are pushed to the batch-processing queue, which is executed e.g. overnight.
